State of HIE in California

Robert M. Cothren, PhD
Executive Director

Transforming Health Information Exchange in California
2 November 2017
Statewide HIE

There is no single statewide HIE in California. HIE (in California) takes place at the
- **regional**, 
- **state**, and 
- **national** level
What is CAHIE?

California Association of Health Information Exchanges

1. Collection of stakeholders promoting statewide information sharing
2. Community that responds to and participates in state and national activities
3. Voluntary self-governance for statewide HIE in California

Find out more about CAHIE at http://www.ca-hie.org/
What is CAHIE?

Promoting HIE

– Convene collaborations on important topics
– Operate a monthly educational webinar
  http://www.ca-hie.org/resources/knowledge-network/
– Monitor current legislation and educate legislators
– Monitor state and national developments
  http://www.ca-hie.org/join-our-mailing-list/
What is CAHIE?

Participating in state and national initiatives

- Collaborative voice of HIE in California
- Participated in the development of PULSE
- Participating in POLST eRegistry Pilot
- Participating in development of a statewide provider directory
- Active in SHIEC, Carequality, eHealth Exchange, DirectTrust, NATE
What is CAHIE?

Voluntary self-governance of statewide HIE

- Single, multiparty data sharing agreement to govern exchange across organizational boundaries
  *California Data Use and Reciprocal Services Agreement*

- Technical services to ensure trust among organizations and facilitate secure data sharing
  *California Trusted Exchange Network*

Find out more about the CalDURSA and CTEN at [http://www.ca-hie.org/projects/cten](http://www.ca-hie.org/projects/cten)
What is HIE?

The mobilization of health care information electronically across organizations within a region, community or hospital system.

Allows health care professionals and patients to appropriately access and securely share a patient’s vital medical information electronically.

The capability to electronically move clinical information among disparate healthcare information systems, and maintain the meaning of the information being exchanged.

The ability of systems to exchange and use electronic health information from other systems without special effort on the part of the user.
Regional Exchange

High-fidelity exchange within a community or enterprise
Community HIOs

- Set the policies associated with data sharing
- Provide the technology that moves data
- Convene stakeholders to solve data sharing problems
- Establish collaboration and trust
HIE Coverage

More than 15 community HIEs
In 39 of 58 counties statewide
Transforming HIE in California

HIE Volume

> 20,000,000 ATDs per month
> 22,000,000 in MPIs (> 56% of CA population)
Organizations Served by HIE

- Acute Care Hospitals
- County PH
- Primary Care
- Specialists
- Ancillary Services
- Payers
- EMS
- Home Health
- Mental Health
- SNF
- Long-Term Care
- Other local government
- Other outpatient
- Substance Use (inpatient)
- Other inpatient
- Social Services
- Substance Use (outpatient)

Percentage Serving these Customers
Services Provided by HIE

- Direct
- Longitudinal Records
- Alerts
- Text Reports
- PH Reporting
- PHR or Patient Portal
- Quality Measures
- Referrals
- CPOE
- E-prescribing

Percentage Offering this Service
Data Exchanged through HIE

Percentage Exchanging this Data Type

- Allergies
- Lab Results
- ADTs
- Text Reports
- Discharges
- Immunizations
- Prescribed Meds
- Radiology Reports
- Care Plans
- Eligibility
- Claims
- Filled Meds

Transforming HIE in California
Statewide Exchange

Connecting communities
California Trusted Exchange Network

**Governance**
Single, multiparty data sharing agreement to govern exchange across organizational boundaries

*California Data Use and Reciprocal Services Agreement, or CalDURSA*

**Infrastructure**
Technical services to ensure trust among organizations and facilitate secure data sharing

*Find out more about the CalDURSA and CTEN at [http://www.ca-hie.org/projects/cten](http://www.ca-hie.org/projects/cten)*
What can you do on the CTEN?

— Query for information about a patient
— Send information about a patient to another user
— Support disaster response

Find out more about the growing set of transactions at http://www.ca-hie.org/initiatives/cten/specifications/
### Signatories
1. Axesson
2. CAHIE
3. California Emergency Medical Services Authority
4. Connect Healthcare
5. Dignity Health
6. Manifest MedEx
7. North Coast Health Information Network
8. OCPRHIO
9. RAIN - Live Oak HIE and Telemedicine Network
10. Redwood MedNet
11. San Diego Health Connect
12. Santa Cruz Health Information Organization
13. San Joaquin Community HIE
14. Sutter Health
15. UC Davis Health System

Los Angeles Network for Enhanced Services
SacValley MedShare

### Participants
1. Axesson
2. California EMS Authority
3. Connect Healthcare
4. Manifest MedEx
5. OCPRHIO
6. RAIN Live Oak HIE and Telemedicine Network
7. San Diego Health Connect
8. San Joaquin Community HIE
9. Santa Cruz HIO

SacValley MedShare
Sutter Health
UC Davis Health System

*Track new participants at [http://www.ca-hie.org/projects/cten](http://www.ca-hie.org/projects/cten)*
MMPA

Model Modular Participants Agreement

A model agreement between HIOs and their exchange participants

- Avoids unnecessary legal costs
- Compatible with the CalDURSA
- Common policies across organizations that use it

Find out more about the MMPA at http://www.ca-hie.org/resources/publications/
Nationwide Exchange

Exchange beyond state lines and enterprise boundaries
Sequoia Project Initiatives

**eHealth Exchange™**

A peer-to-peer network of federal agencies and HIOs enabling (primarily) query-based document exchange, governed by the DURSA

**carequality**

A (largely vendor-based) network-of-networks framework enabling query-based document exchange, governed by the CCA
Patient Centered Data Home

Cost-effective, scalable method of exchanging patient data among HIEs based on triggering episode alerts which notify providers a care event has occurred outside of the patient’s “home” HIE.
## National Networks
